feel *new imagination*

Shine that travels from grain to grain laminate luxury, built to endure, a world of patterns in a single layer of resilience laminate artistry for everyday spaces, and from kitchen bite to enduring glow laminate finishes that tell your story.

FEATURES

 <p>Low Emission Engineered with Low Emission Technology, ensuring a healthier atmosphere and not compromising on indoor air quality.</p>		 <p>Low Toxicity Features a biocidal design, our products guarantee an ideally safe and hygienic environment, keeping your health safe indoors or outdoors without sacrificing elegance.</p>	
	 <p>Impact Resistant Our surfaces are sturdy enough to take the impact of day-to-day objects naturally thrown upon the floors.</p>		 <p>Anti Bacterial This laminate possesses the capacity to eliminate/inhibit the growth of bacteria on the built surface, thus eliminating the spread of microbes on floors.</p>
 <p>Scratch Resistant A range of upper-glass laminate surfaces that are designed to stand up to daily wear, scratches & abrasion which naturally may occur and compromise the look of other laminate.</p>		 <p>Zero reflection No Glare. No Distraction. See Clarity. Feel Perfection Advanced Surface with Zero Reflection Technology.</p>	
	 <p>Termite Proof This property possesses the capacity to eliminate/inhibit termite infestations, preventing the insects from damaging or feeding on the laminate.</p>		 <p>Heat Resistant Our fire heat resistant laminates have superior resistance to flame or any heat that naturally occurs, or performs in demanding machinery.</p>

TECHNICAL SPECIFICATIONS

SR NO.	PROPERTIES	UNIT	REQUIREMENT AS PER ISO 9001:2015	IFIL mica
1	Thickness	1 mm	± 10%	✓
2	Resistance to surface wear	Revolutions (Min.)	350 (Min.)	✓
3	Resistance to immersion in boiling water			
	•Mass increase	% (Max.)	10.0	✓
	•Thickness increase	% (Max.)	11.8	✓
	•Appearance	Grade (Max.)	4	✓
4	Resistance to dry heat at 180° C	Grade (Min.)	4	✓
5	Dimension stability at elevated temperature			
	•Longitudinal	% (Max.)	0.55	✓
	•Transverse	% (Max.)	1.025	✓
6	Dimension stability at 20° C			
	•Longitudinal	% (Max.)	0.375	✓
	•Transverse	% (Max.)	0.6	✓
7	Resistance to impact by small diameter ball	'N' (Min.)	20	✓
8	Resistance to cracking	Grade (Min.)	4	✓
9	Resistance to scratching	'N' (Min.)	2	✓
10	Resistance to staining	Reagent 1+2 (Min.)	5	✓
		Reagent 3+4 (Min.)	4	✓
11	Resistance to colour change			
	• In xenon arc light	Wool standard (Max.)	6	✓
	• In enclosed carbon arc light	Wool standard (Max.)	5	✓
12	Resistance to cigarette burns	Grade (Min.)	3	✓
13	Resistance to steam	Grade (Min.)	4	✓
14	Appearance		Free From foreign particles	✓

*All tests may not be valid for embossed and metallic laminates

PURE PHENOLIC PRODUCTS

LOW EMISSION

ANTI BACTERIAL

GENUINE THICKNESS

STAIN FREE

INSTALLATION, CARE AND MAINTENANCE GUIDELINES

Storage & Carrying : Store the sheets horizontally with their face turned down. Place a thick hard board on top of the laminates to protect them from any kind of damage. Stock the laminates in such a way that older sheets will be used first. Store the laminates in a dry place to protect them from moisture. They should also be stored in such away that they don't come in contact with the floor or walls. Always carry the sheets vertically. Don't slide the sheets, lift them while moving them from one place to another. Ideally 2 people should carry one sheet to avoid carelessness that can damage the surface

Stains : The laminates are resistant to stains belonging to Group 1 and 2. Stains of Group 3 and 4 should not be spilled on the surface. In case of spillage, the stains should be immediately wiped off.

Abrasives : Abrasive pads, scouring powders or cleansers can permanently damage the laminates making them more susceptible to staining.

Hot Objects : Even though the laminates have high heat resistance, exposure to temperatures greater than 135°C is not recommended. Do not place hot frying pans or dishes directly from the oven or cooktop on the laminate surface. As a

precaution, use a trivet or insulated pad to protect the surface from heat generating appliances such as pressing irons, toasters, curling irons and electric cookers. Prolonged exposure to temperatures above 65°C may result in separation of the laminate from the substrate.

Sharp Objects : Never use knives or other sharp objects directly on the decorative surface. Use a chopping block or counter
